

QUALITY POLICY

MARTÍNEZ SEGOVIA, FERNÁNDEZ, PALLÁS Y ASOCIADOS. INGENIERÍA Y ARQUITECTURA, S.A., an Engineering and Architecture Consulting company, has implemented the Management System UNE EN ISO 9001 for the following activities:

Engineering Services for Public Works, Industrial Facilities, Building and Utilities (Design, Project Supervision, Site Management and Technical Assistance)

The Company's philosophy is to meet the needs and expectations of the stakeholders in its sector, always complying with the applicable requirements.

To maintain the trust of the interested parties, our Company is permanently immersed in a search for improvement opportunities for its Products (Projects, Reports, etc.), its Project Management & Technical Assistance and its Quality Management System, acquiring the commitment to comply with the requirements and objectives of these interested parties as well as the continuous improvement (innovative construction processes, optimization of structural solutions, BIM methodology, etc.)

Our personnel are aware of these commitments and the importance of their role within the Company.

This policy is summarized in the following principles, which are developed in depth in the objectives, and which serve as fundamental reference in the management of this company:

Quality is everyone's responsibility

Our staff participation, commitment and contribution are the key to achieve quality.

The Client is the center of everything we do

Our end goal is to understand our client's needs and satisfying them in the best possible way.

Constant improvement of our system is fundamental for success

Continuously challenging ourselves to achieve the excellence of our products and services.
